

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A stand alone monitor for connecting to an external computer, the monitor comprising:

a housing detached from the external computer;

a flat panel display disposed in the housing for displaying image data provided by the external computer;

a pagewidth inkjet printhead for printing print data provided by the external computer onto paper, the pagewidth inkjet printhead being disposed in the housing behind the flat panel display as viewed by a user;

a connection configured to allow releasable operative connection of the external computer to the monitor, for receiving the image data and print data;

a multi-sheet paper holder for holding multiple paper sheets;

a paper sheet separator configured to separate a single paper sheet from the paper sheets in the multi-sheet paper holder for supply to the pagewidth inkjet printhead; and

a paper feed mechanism for feeding the single paper sheet to the pagewidth inkjet printhead for printing.

2. (Currently Amended) A stand alone monitor as claimed in claim 1 wherein a viewable size of the monitor exceeds 40cm measured along a diagonal of the monitor.

3. (Currently Amended) A stand alone monitor as claimed in claim 1, comprising at least two printheads, the printheads being disposed on either side of a path through which the single paper sheet is fed for printing, thereby enabling substantially simultaneous printing of both sides of the single paper sheet.

4-9. (Canceled)

10. (Currently Amended) A stand alone monitor as claimed in claim 1, wherein the paper feed mechanism is configured to position the single paper sheet substantially parallel in at least one direction with respect to a plane defined by the flat panel display.

11.-12. (Canceled)

13. (Currently Amended) A stand alone monitor as claimed in claim 1, wherein the printhead is a process color printhead.

14. (Canceled)

15. (Currently Amended) A stand alone monitor as claimed in claim 1, wherein the printhead has more than 5,000 inkjet nozzles.

16. (Canceled)

17. (Currently Amended) A stand alone monitor as claimed in claim 1, wherein the flat panel display measures at least 14 inches on the diagonal.

18. (Canceled)

19. (Currently Amended) A stand alone monitor as claimed in claim 1, configured to enable printing of standard A4 or Letter sized sheets of paper.

20. (Canceled)

21. (Currently Amended) A stand alone monitor as claimed in claim 1, further including a curved paper guide disposed, when the monitor is in use, beneath the flat panel display, such that the single paper sheet that has been printed is urged horizontally as the single paper sheet exits the monitor.

22. (Currently Amended) A stand alone monitor as claimed in claim 1, wherein the flat panel display is of one of the following types:

- Liquid Crystal Display (LCD);
- Organic Light Emitting Diode (OLED);
- Field Emission Display (FED); and
- Plasma Display Panel (PDP).

23. (Currently Amended) A stand alone monitor as claimed in claim 1, wherein the printhead is configured to receive halftoned print data to be printed onto the single paper sheet.

24. (Currently Amended) A stand alone monitor as claimed in claim 1, further including a halftoning unit for generating halftoned image data and supplying halftoned image data to the printhead for printing.

25. (Currently Amended) A stand alone monitor as claimed in claim 1, wherein the printhead is configured to print photographic images.

26. (Currently Amended) A stand alone monitor as claimed in claim 1, wherein the printhead is configured to print image and text data.

27-28. (Canceled)

29. (Currently Amended) A stand alone monitor as claimed in claim 1 further comprising:

a stand for holding the flat panel display in an operative position, the stand including at least one receptacle configured to accept at least one replaceable ink cartridge for supplying ink to the printhead.

30. (Currently Amended) A stand alone monitor as claimed in claim 1 further comprising:

a data connection hub configured to allow connection of at least one data-receiving device to the monitor, enabling the data-receiving device to receive data from the external computer.

31. (Currently Amended) A stand alone monitor as claimed in claim 1 wherein, during printing, the paper sheet being printed onto passes between the flat panel display and the printhead, or passes behind the flat panel display and the printhead relative to a viewing position of the flat panel display.

32. (Cancelled)

33. (Currently Amended) A stand alone monitor as claimed in claim 1 further including an interface for connecting to a computer system, and being configured to:

- receive, via the interface, input from a user indicative of a print command;
- send to the computer system, a print request;
- receive, from the computer system and in response to the print request, a document to be printed; and
- print the document.
